Our Retail-Ready Seafood Range

At Moofish, we deliver premium Australian seafood in packaging formats designed for convenience, freshness, and visual appeal. Each option is tailored for easy retail display and optimal product care.

Thermo Formed Pack

A vacuum-sealed option perfect for preserving freshness and reducing waste. Commonly used for fresh fillets such as salmon portions, ling portions, and tuna portions - ideal for fridge or freezer displays.

Sealed MAP Tray

A clear-lidded tray offering a clean, professional presentation while keeping the product secure. Suitable for whole fish, marinara mix, or seafood skewers. Easy to stock and stack in chilled displays.

Skin Pack

A vacuum-sealed film that tightly hugs the product to a flat tray, locking in freshness and enhancing shelf life. Ideal for premium fish portions like ocean trout and barramundi, or value-added items such as fillets paired with a compound butter.

Each format is made to suit modern retail needs and provide your customers with the best in seafood presentation and care.
